Nov-8-2023

Dear EAACI Board members,

It was just brought to our attention that among the hostages taken by Hamas on Oct-7-2023, there is a 12 years old boy, named Yagil Jacob who has IgE-mediated peanut allergy.

This patient was followed at Shamir Medical Center, which is a WAO Center of Excellence.

Since he was taken captive, the patient was not seen once by representatives of the Red Cross, his condition is unknown, he does not have injectable epinephrine with him, and he is at risk for fatal anaphylactic reactions.

As an association representing allergic patients worldwide, we urge you to call upon the Red Cross to visit Yagil immediately, examine his health, and make sure he has epinephrine available with him.

Sincerely,  
Arnon Elizur  
Yuval Tal  
Ramit Maoz Segal  
Idit Lachover Roth  
Alon Hershko

On behalf of all IAACI members
